

Corrosion Protection

BeauGuard Coatings uses a special closed cell system, which has a Monolithic Vapor Barrier (Gas Barrier) & Hydrophobic surface (Water Barrier), encapsulating rust and preventing further corrosion by sealing off all effects of the outside environment.

All other paints are OPEN Cell and will deteriorate & fail over a shorter period of time. A Closed Cell Coating means it does not allow any air/gas or liquid to penetrate through to any surface that was coated with BeauGuard Coatings.

BeauGuard Coatings can be directly applied to rust and provide long term protection.

Benefits:

Product Cost

reduce costs by 50%

Labor

50% less prepwork with only 2 coats

Protection

10-15 years (5x over others)

Energy Savings

25%-40%

Our Products

BeauGuard Defense

Advanced Marine Grade Coating
Proprietary Military Formula
(for Government use only)

BeauGuard Bond

Specialty bonding
agent and primer, used to
pre-coat porous substrates

BeauGuard Armor

Advanced Marine
Grade Industrial Coating for
superior substrate protection

BeauGuard Shark

Advanced Marine
Grade Non-Skid (Floor)
Industrial Coating

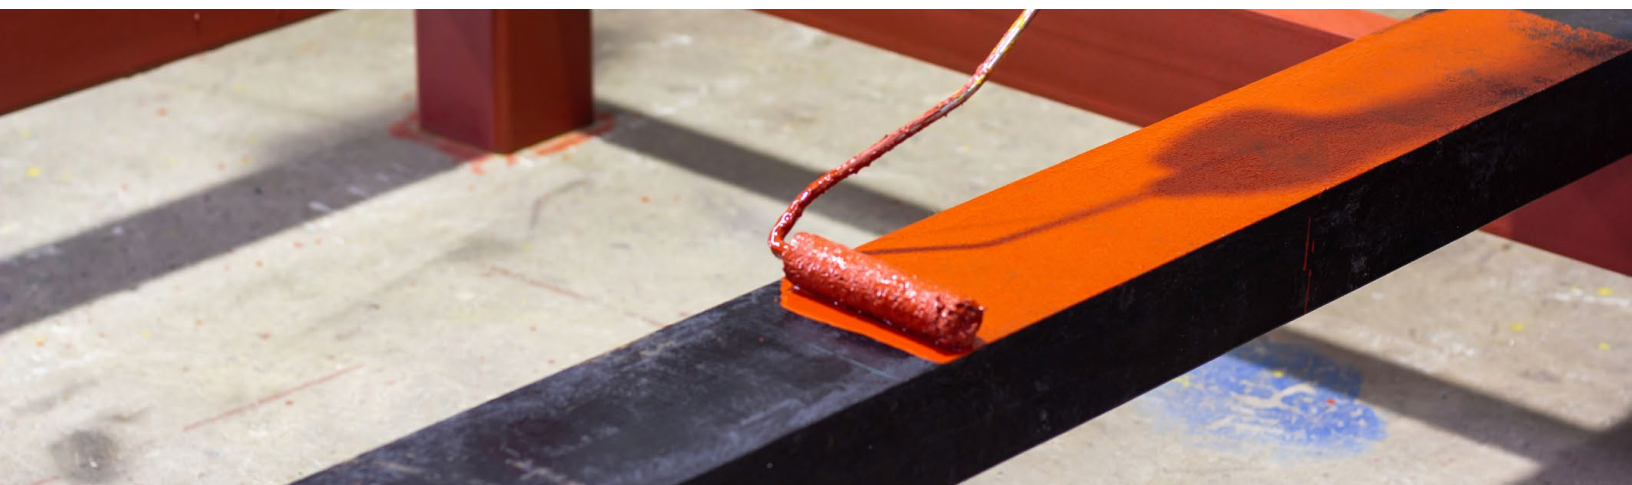

BeauGuard Fiber

Advanced Marine
Grade Fiber Filler Industrial
Coating to effect repairs.

BeauGuard Grip

Advanced Marine
Grade Non-Skid (Grip)
Industrial Coating

BeauGuard *Properties*

Product Quality

- Closed Cell system, BeauGuard is a 100% pure coating
- Hydrophobic Surface (Water Repellant)
- Monolithic Vapor Barrier (Gas Barrier)
- Corrosion & Rust Preventative
- Insulation Factor- equivalent insulation factor of R19
- Maximum sunlight temperature 106 °F / 41 °C
- Inhibit material breakdown from UV light
- Resist 0-14 ph level (Acidic 0 - Alkaline 14)
- Low VOC >50 Grams / gal.
- Flexibility & Strength
- 700% Elongation
- Extreme Tensile Strength 1,500 Psi
- Anti Fouling
- Anti Mold and Mildew
- Snow & Ice Repellent

Application Benefits

- All Green water based Product
- Long-term Asset Life Protection & Extension
- Single Component
- Easy application: Dipped / Brushed / Rolled / Sprayed
- Application on 99% of all substrates
- Easy Repair
- 5 Year Shelf Life
- Return on Investment (ROI)
- Does NOT contribute to flammability or toxic smoke
- Ultra High Reflectivity 97.3% (color: white)
- RAL K7 Classic: 213 basic colors

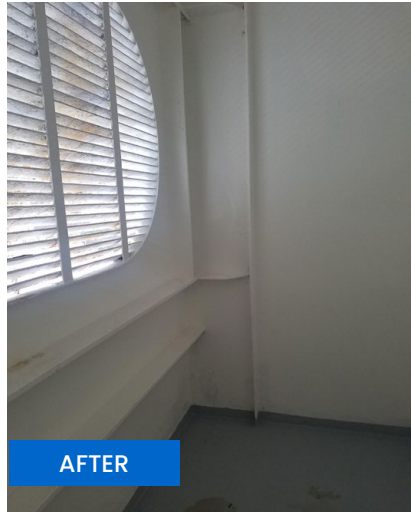

Environmental Assessment

All raw materials used for the manufacture of BeauGuard products are environmental green and recyclable. BeauGuard is a water based product pushing the limits of being an all green company.

An Environment Assessment was conducted on June 9, 2017 to meet UN (United Nations) standards, for BeauGuard products to be used in Africa for development projects.

The manufacture and application of any BeauGuard product poses no significant risk of introducing any pollutant into the environment (water source & wildlife).
